**Subject:** PFAS-related request: Picatinny Permit List

Scott:

Good evening.

As I have noted to you, the ARCADIS-related contract issue has been resolved and the Picatinny PFAS-related activities are re-commencing.

ARCADIS has asked me to initially contact you to provide the well records within .5 mile to one mile south of Picatinny's southern boundary. You can provide the files directly to Lisa and Michele of ARCADIS - whose emails are in the cc above. After this email, Lisa or Michele may be contacting you shortly with more requests, if necessary.

Also note that the Army management has agreed to sample drinking water wells within the band of a mile with the caveat that wells on the south-side or other side of the hydraulic barrier of Rockaway River will not be sampled. This can be discussed during our next conference phone call if necessary.

Thanks.

Ted
